## Summary

With 5.5 years of experience as a MERN Stack Developer, I excel in creating robust web applications. Proficient in MongoDB, Express.js, React, and Node.js, my expertise spans end-to-end development. I specialize in crafting scalable back-end systems, designing responsive front-end interfaces, and ensuring seamless data flow. Well-versed in RESTful API development, database management, and the intricacies of the MERN stack, I bring a wealth of knowledge to elevate every project I undertake.

## Experience

### > Software Engineering Team Lead

Accenture

Jun 2022 - Present (1 year 8 months)

- Led my team to successfully deliver high-quality code within stringent deadlines, showcasing effective leadership in project management.
- Spearheaded the implementation of techniques to enhance the overall efficiency of the team, resulting in streamlined workflows and improved productivity.
- Contributed to the development of various web applications, focusing on frontend design and implementing critical functionalities such as EMI calculators, loan calculators, and investment tools for our client's website.
- Demonstrated expertise in the financial sector by working on diverse banking applications, including money transfer, card replacement, card control, card blocking, and claim center applications.
- Played a key role in the development of comprehensive end-to-end banking applications, ensuring a seamless user experience and robust functionality.
- Successfully revamped the entire user interface of multiple client web applications utilized as web views in mobile apps, contributing to a more modern and user-friendly design.
- Drove initiatives to improve application scalability and compatibility, enhancing overall performance and user satisfaction.
- Proactively addressed security concerns in web applications by implementing techniques to safeguard sensitive information, perform bot user checks, and mitigate potential vulnerabilities.

### > Application Development Senior Analyst

Accenture

Jul 2021 - Jun 2022 (1 year)

- Orchestrated the development of numerous webpages for the client's website, ensuring punctual end-to-end deliveries and meeting project deadlines consistently.

- Engineered feature-rich client websites with a meticulous focus on meeting all requirements, resulting in the creation of high-quality, well-structured code.
- Spearheaded the frontend development for the client's KYC website, leveraging modern frameworks to ensure a cutting-edge and user-friendly interface.
- Played a pivotal role in the continuous development and maintenance of bank websites, integrating the latest updates and addressing security vulnerabilities for enhanced cybersecurity.
- Diagnosed and resolved various bugs and issues within the client's website, contributing to the continuous improvement and seamless operation of the online platform.

## **Application Developer**

IBM

May 2018 - Jul 2021 (3 years 3 months)

- Led multiple end-to-end change deliveries on client applications using an Agile approach, employing React, HTML, CSS, JavaScript, and APIs for seamless integration.
- Elevated the functionality of the existing client website by incorporating additional features through the implementation of cutting-edge web frameworks.
- Functioned as a full-stack web developer, creating an informative team website to facilitate easy access to project details and essential information for team members.
- Implemented a robust CRUD application for database interaction, demonstrating proficiency in executing SQL queries for data retrieval, updates, and inserts.
- Developed WEB APIs to support a client-based application, contributing to the smooth operation and functionality of the system.
- Undertook modifications on an existing Chatbot website, introducing new features and refining visual elements for an enhanced user experience.
- Engineered RESTful Web APIs for a client-based iOS app, delivering data in JSON format, and executed SQL queries to enable CRUD functionalities.
- Implemented advanced password encryption protocols for heightened security in the client's application.
- Collaborated within an Agile framework, actively participating in scrum methods, daily stand-ups, sprint demos, and retrospective meetings to ensure effective project management and seamless team coordination.

## **Education**

**KIIT - Kalinga Institute of Industrial Technology**

Bachelor of Technology (BTech), Information Technology

2014 - 2018

**KIIT International School**

10+2 science

2012 - 2014

## Licenses & Certifications

**Microsoft Certified: Azure Fundamentals - Microsoft**

## Skills

Node.js • HTML5 • Cascading Style Sheets (CSS) • REST APIs • JavaScript • JSON • React.js • Angular

## Honors & Awards

**Above and Beyond the Call of Duty Award - IBM**

Aug 2019

Honored as an emerging star for outstanding code deliveries, I received this prestigious award in recognition of a year of consistently excellent work and timely releases to meet stringent deadlines.

Notably, I was one of the youngest employees in project to achieve this accolade.
