Frontend developer with knowledge in building web applications using the latest technologies like ReactJS, JS, HTML, CSS, and other frontend frameworks. Also having expertise in working with NodeJS, APIs, Java, and Databases.

Experience

Software Engineering Team Lead

Accenture

Jun 2022 - Present (1 year 6 months)

- Under my leadership, my team successfully managed to deliver high-quality code deliveries under strict deadlines.
- Recommended and executed techniques that would enhance the team's efficiency.
- Worked on several web applications implementing frontend as well as logic for EMI calculator, loan calculator, and investment calculators for the client website.
- Worked on several banking-related web applications like money transfer applications, card replacement, card control and card blocking applications, claim center applications, etc
- Worked extensively on end-to-end banking apps.
- Worked on modification of the entire UI of multiple client web applications used as a webview in mobile apps.
- Worked on improving applications by making it scalable and compatible
- Worked on improving security flaws in the web application by providing techniques that would hide sensitive information, checking bot users, etc.

Application Development Senior Analyst

Accenture

Jul 2021 - Jun 2022 (1 year)

- Developed several webpages for the client's website ensuring timely end-to-end deliveries
- Developed and structured feature-rich client websites, ensuring that all needs were met; created high-quality code.
- Worked on the frontend for creating the KYC website for the client using the modern frameworks
- Worked on developing and maintaining bank websites with the latest updates and tackling the security flaws
- Worked on several bugs and fixes in the client's website.

Application Developer

IBM

May 2018 - Jul 2021 (3 years 3 months)

- Worked on several end-to-end change deliveries on Client Applications in an Agile way using React, HTML, CSS, JS and APIs.

- Worked on enhancing the existing Client Website by adding additional features using the latest web frameworks.
- Worked as a full-stack web developer and build a website for the team having information on the project so that it will be easy for team members to access and get the required information.
- Implemented CRUD application for database interaction. Executed SQL queries for fetching, updating, inserting data.
- Developed WEB APIs for a client-based application.
- Worked on several changes on the existing Chatbot website, implementing functionality and making necessary changes in visual and appearance.
- Build several RESTful Web APIs for a client-based iOS app that produced data in JSON format. Executed SQL queries for CRUD functionalities.
- Worked on Password Encryption for client's application.
- Worked in Agile methodology using scrum methods and be a part of daily stand-ups, sprint demo and retrospective meetings.
